VEGA

VEGATOR 111/112

Version, available since	Description
1.2.1, 08/2021	**Error correction:** - Logic gate changed in schmitttrigger entrance
1.2.0, 11/2014	**Error corrections:** - Relay type 24 V changed to 18 V pull-in voltage - Downward compatibility given (the middle index was incremented by mistake)
1.1.1, 11/2014	**Error corrections:** – Layout change LED and switch position corrected – Recommendation from SIL Assessment, additional diagnosis measure implemented – Extension of the switching on impulse suppression
1.1.0, 06/2014	**Error corrections:** – Preventative measure to avoid problems through batch variation of components in the measured value processing. – Downward compatibility given (the middle index was incremented by mistake)
1.0.1, 03/2014	**Error corrections:** – Problems with the switching on delay (false signal with low temperatures)
1.0.0, 02/2014	**First version**

Overview of the hardware versions

Legend:

Name	Description
Version	xx.yy.zz xx: Compatibility version.. Will be increased when the compatibility to the previous version is no longer given. Value range 0 … 99. yy: Function extension version. Will be increased when new functions or function changes were carried out on the previous version. Also errors can have been corrected with a function change. Value range 0 … 99. zz: Error correction version. Will be increased when only errors were corrected on the previous version. Value range 0 … 99.
available since	Month/Year
