VEGA

VEGABAR series 80 PA

Version	Description
1.03.01-00	**New functions:** • Position correction with application "Density-compensated level" added **Error corrections:** • Unit "Distance of sensors" corrected
1.02.01-01	**Error corrections:** • Package can also be imported in PDM6.0 SP5
1.02.01-00	**New functions:** • New application "Density-compensated level" • Single layer correction in Slave mode • Thermoshock suppression for Master and Slave can be adjusted separately • Selectable menu languages for PLICSCOM extended by Chinese and Japanese **Error corrections:** • None
1.01.01-00	**First DD version for adjustment** **Applications:** • Process pressure • by means of dielectric constant • Flow • Differential pressure (in conjunction with electronic differential pressure) • Density (in conjunction with electroni differential pressure) • Interface (in conjunction with electronic differential pressure)
