

#### Reliable

Approved materials acc. to FDA and EC 1935/2004

### Cost effective

Continuous coating is ensured thanks to maintenance-free operation

#### **User friendly**

Simple mounting

# Drum coater storage tank

# Level measurement and point level detection in the storage tank of a drum coater

In the pharmaceutical industry, tablets are coated with colouring agents or active ingredients in a drum coater. This coating in the form of a liquid suspension, contains colouring or solids and is stored in a storage tank next to the drum. It is sprayed into the drum via nozzles for even distribution on the surface of the tablets. Reliable level measurement in the storage tank is required to ensure that there is always enough of the liquid suspension for tablet coating. Overflow and dry run protection is provided by a reliable level switch.

#### More details

## **VEGAPOINT 21**

Capacitive level switch as overfill and dry run protection in a supply tank

- Simple operation, including optical switching display
- Reliable switching point, non-sensitive to buildup
- Compact design ideally suited for tight spaces

# **Show Product**

# **VEGAPULS 6X**

Non-contact level measurement with radar in a storage tank

- Reliable and accurate measurement even in small tanks
- Approved materials according to FDA and EC 1935/2004 ensure hygienic storage of the suspension
- Direct measured value display on the sensor and via Bluetooth for easy visualization of the container contents
