

Reliable

Reliable dry run protection of these expensive, easily damaged pumps

Cost effective High availability of the pumps

User friendly

Product independent function, thus simple setup and commissioning

Pumps for wet strength agent

Pressure measurement and point level detection for eccentric pumps

Wet strength agents are polymeric additives that enhance water resistance properties, especially in sanitary and specialty papers. They are applied in the paper machine via a size press or spraying device. Because of their high pH value, these substances are stored in double-walled GRP (glass reinforced plastic) tanks. The high viscosity of the medium requires the use of a pneumatic conveyor system and special eccentric pumps for filling and emptying. With these pump types, dry run protection and pressure monitoring is a necessity.

More details

VEGABAR 38

Pressure monitoring of pipelines leading to the paper machine

- Small, front-flush process fitting
- High measurement certainty through vacuum-resistant design

Show Product

VEGAPOINT 21

Capacitive level switch for dry run protection for eccentric pumps

Accurate and reliable function through product-independent switching point
Setup without adjustment
