

#### Reliable

Reliable dry run protection of these expensive, easily damaged pumps

## Cost effective

High availability of the pumps

#### **User friendly**

Product independent function, thus simple setup and commissioning

# Pumps for wet strength agent

# Pressure measurement and point level detection for eccentric pumps

Wet strength agents are polymeric additives that enhance water resistance properties, especially in sanitary and specialty papers. They are applied in the paper machine via a size press or spraying device. Because of their high pH value, these substances are stored in double-walled GRP (glass reinforced plastic) tanks. The high viscosity of the medium requires the use of a pneumatic conveyor system and special eccentric pumps for filling and emptying. With these pump types, dry run protection and pressure monitoring is a necessity.

#### More details

#### **VEGABAR 38**

Pressure monitoring of pipelines leading to the paper machine

- Small, front-flush process fitting
- High measurement certainty through vacuum-resistant design

#### **Show Product**

## **VEGAPOINT 21**

Capacitive level switch for dry run protection for eccentric pumps

- Accurate and reliable function through product-independent switching point
- Setup without adjustment
