

### Reliable

All materials are fully chemically resistant

### **Cost effective**

Universal application, independent of product characteristics and process conditions

### **User friendly**

Maintenance-free operation

### Chlorine storage tank

# Level measurement and point level detection in storage tanks for chlorine

Chlorine production and storage places high demands on the chemical and the diffusion resistance of the materials in the production equipment. Extensive process knowledge and experience is required when selecting the sealing materials. In fact it is decisive for the long-term, safe and profitable operation of the plant. Since the processes can only be interrupted at great expense and plant disruption, the reliability of the instrumentation is a top priority.

#### More details

### **VEGAPULS 6X**

Level measurement with non-contact radar sensor in the storage tank for chlorine

- Reliable level measurement under all process conditions
- Optimum chemical resistance is ensured by a diffusion-tight, 8 mm thick PTFE disc
- Maintenance-free operation with very long service life

### **VEGASWING 63**

Point level detection with vibrating level switch in the storage tank for chlorine

- Reliable level detection under all process conditions in wide temperature and pressure ranges
- Various highly resistant materials are available to meet widely different demands on chemical resistance
- Simple function check with test button on the sensor
