

Reliable

High supply reliability through dependable measurement

Cost effective

Maintenance-free operation

User friendly

Simple mounting and parameterization

Elevated storage tanks

Level measurement in the elevated tank

Elevated water tanks are reservoirs located at high places that act as a buffer during periods of peak demand. They compensate for delivery fluctuations and enable efficient plant operation. Reliable level measurement is therefore indispensable.

More details

VEGAPULS C 22

Non-contact level measurement with radar in the elevated tank

- Reliable, water proof and unaffected by condensation
- Maintenance-free operation through non-contact measurement
- Secure, user-friendly wireless operation via Bluetooth with smartphone, tablet or PC
- Simple installation with additional mounting accessories

VEGADIS 82

External display and adjustment unit for 4 ... 20 mA/HART sensors

- Measured value display can be connected anywhere along the supply cable
 of the sensor
- Easy-to-read display with plain text and graphics
- Simple operation via four keys and clearly structured menu
