

#### Reliable

Reliable measurement, even in abrasive media

Cost effective Standard sensors for all applications

**User friendly** Simple setup and low maintenance

# Storage silo for sugar and flour

# Level and pressure measurement in storage silos

Flour and sugar are the basic ingredients for many food products and stored in silos up to 20 metres high. The filling and emptying is often performed by pneumatic systems that transport the media from the large external silos and deposit them in smaller holding vessels for further processing. The filling and emptying processes are controlled by reliable level measurement. Pressure monitoring is also needed in the pneumatic conveying pipelines.

#### More details

# **VEGAPULS 6X**

Radar sensor for level measurement in the flour and sugar silos

- Precise focusing of the measurement signal, which means convenient installation almost anywhere on the silo roof is possible
- Accurate, reliable measurement data despite dust and noise
- · Measurement even during filling, thereby ensuring continuous monitoring of the filling process via a control system

### **Show Product**

# **VEGABAR 82**

Pressure transmitter for monitoring pressure in the conveyor pipeline

- Wear-resistant CERTEC® ceramic measuring cell, insensitive to abrasion
- Maintenance-free through front-flush mounting
- Robust measuring cell for long service life
