Easy setup and installation

Sulphur pit

Level measurement in sulphur pits

The liquid sulphur, which comes directly from the sulphur recovery plant, is stored in underground concrete pits. High temperatures are required to maintain the sulphur in its liquid form. The harsh, corrosive process and environmental conditions in sulphur pits require dependable level measurement.

More details

VEGAPULS 6X

Non-contact level measurement with radar in sulphur pits

- Maintenance-free operation through non-contact measuring principle
- Wetted parts are extremely corrosion resistant
- Reliable measurement independent of vapour, buildup and condensation
- Very good focusing allows reliable operation even in confined spaces
