

Reliable

Redundant measurement ensures a high degree of safety

Cost effective

Self-monitoring reduces maintenance costs

User friendly

Easy installation and setup

Finished product tanks

Level measurement and point level detection of finished product tanks

Reliable level measurement of crude and bulk liquids storage tanks in a refinery is necessary for inventory management and overspill protection. Multiple measurement devices can fit into a single process fitting.

More details

VEGASWING 63

Vibrating level switch for overfill protection in finished product tanks

- High level switch provides redundancy
- Maximum flexibility through switching point adaptable to the application
- By simply pushing a button, you can meet the requirements of WHG and SIL of the periodic test
- Unaffected by media properties ensures reliable measurement

Show Product

VEGAPULS 6X

Level measurement with radar in end-product tanks

- Simple retrofitting, as existing process fittings can continue to be used
- Exact measuring results regardless of temperature, gas or steam
- Certified according to SIL 2 and WHG for use as overfill protection
