

#### Reliable

Certified materials according to FDA and EC 1935/2004 regulations

Cost effective Easy cleaning of the vessel

User friendly Simple installation through existing ball valves

# Reaction vessel with agitator

## Level measurement during the production of chewing gum base

Production of polyvinyl acetate – the base material for chewing gum – is carried out in a reaction vessel with a four stage agitator. The various raw materials begin to react when they are mixed by the agitator. To ensure smooth production, accurate level measurement is required.

## More details

### **VEGAPULS 6X**

Radar sensor for level measurement during the polymerization of chewing gum base in the reaction vessel

- Measuring results unaffected by agitator thanks to false signal suppression
- Strong focusing through small beam angle
- Measurement down to vessel bottom, even in media with low dielectric constant
