

#### Reliable

Reliable measurement ensures a continuous supply of raw material

#### Cost effective

Optimal stocks ensure continuous production

#### **User friendly**

Maintenance-free operation

## Raw meal silo

## Level measurement and point level detection in raw meal silos

Before being burned in the rotary kiln, the material from the blending bed and the aggregates are ground to a fine raw meal in large mills. The powdery material is then transported to the silo by a pneumatic conveyor system. Reliable monitoring of the level is essential for optimal raw material storage.

#### More details

### **VEGAPULS 6X**

Level measurement with radar in raw meal silos

- Reliable measurement, unaffected by dust and buildup
- Maintenance-free operation thanks to encapsulated antenna system
- · High plant availability, because wear and maintenance-free

## **Show Product**

#### **VEGAWAVE 63**

Vibrating level switch as overfill protection in raw meal silos

- Reliable product-independent switching point
- Long service life thanks to robust sensor construction
- Simple setup without adjustment
