

Reliable

Reliable measurement of the process water volume

Cost effective

Maintenance-free measurement with high accuracy

User friendly

Simple installation and setup

Process water tank

Level measurement in the process water tank

The process water is collected in tanks or open basins. Pressure pumps deliver the water for cleaning and rinsing purposes to various locations in the wastewater treatment plant. To ensure an optimal supply of water, the level in the process water tank is measured continuously.

VEGAPULS 11

Continuous level measurement with radar in the process water tank

- Low-cost radar sensor for simple measuring tasks
- Maintenance-free operation through non-contact 80 GHz radar technology
- Secure, user-friendly wireless operation via Bluetooth with smartphone, tablet or PC

[Show Product](#)

VEGAMET 841

Controller for powering the sensor, processing and displaying the measured values

- Clear, easy-to-read, user programmable display
- Robust housing designed for the harsh conditions in the field
- Universal controller for water and wastewater applications

Measuring range - Distance
8 m

Process temperature
-40 ... 60 °C

Process pressure
-1 ... 3 bar

Accuracy
± 5 mm / ± 0.2"

Frequency
80 GHz

Beam angle
8°

Materials, wetted parts
PVDF

Threaded connection
G1½, 1½ NPT, R1½

Seal material
FKM

Housing material
Plastic

Protection rating
IP66/IP67, Type 4X

Input
1 x 4 ... 20 mA sensor input

Output
1 x 0/4 ... 20 mA current output
3 x operating relay
1x failure relay (instead of operating relay)

Ambient temperature
-40 ... 60 °C
