

Reliable

Precise measurement regardless of the medium

Cost effective

Multi-sensor flange reduces costs in planning and commissioning

User friendly

Simple installation of the radar, pressure and high level alarm sensors in one multi-sensor flange

Cargo tank

Measurement of level, point level and pressure in the cargo tanks on board

The levels in storage tanks, especially those on board chemical tankers must be continuously measured. This is especially important to monitor during loading and unloading operations, because of strict safety and environmental requirements. Any overfilling or product discharge on deck or into the sea could have devastating consequences for human life as well as the wider environment. Also, to prevent damage to the tanks caused via external temperature fluctuations, or overpressure and underpressure created by charging and discharging procedures, the internal tank pressures require continuous monitoring.

More details

VEGAPULS 6X

Radar sensor for continuous level measurement in cargo tanks

- Independent of medium properties, temperature, pressure or gas overlay
- $\blacksquare \ \, \mathsf{PTFE}\text{-}\mathsf{protected}, \, \mathsf{front}\text{-}\mathsf{flush} \, \, \mathsf{antenna}\text{: optimal chemical resistance even in aggressive media}$
- Measurement all the way to the tank bottom, also in media with low dielectric constant
- Strong focusing of the radar beam allows accurate measurement even in tanks with heating coils

Show Product

VEGABAR 82

Pressure transmitter for monitoring gas pressure in the cargo tank

- Precise measurement of the internal tank pressure by capacitive CERTEC® ceramic measuring cell
- Capacitive ceramic CERTEC® measuring cell offers excellent chemical resistance even in aggressive media

Show Product

VEGASWING 63

Vibrating level switch for high alarm (95 %) and high-high alarm (98 %)

- Robust sensor in alloy or stainless steel, resistant to aggressive media
- Test key on instrument allows fast and secure verification of function
- Exact switch point even with changing media optimises tank capacity
