

Reliable

Certified hygienic design (3A/EHEDG) and approved materials according to EC 1935/2004 and FDA

Cost effective

Certified hygienic design of the sensors reduces cleaning time

User friendly

Simple installation and setup

Level measurement and point level detection in the storage container

The rennet is needed to coagulate the milk when making cheese. It is stored in a storage container and metered out into the cheese vat as needed. Reliable level and point Level detection are essential to ensure that sufficient rennet is on hand for continuous cheese production.

More details

VEGABAR 83

Pressure transmitter for hydrostatic level measurement

- Reliable measurement at all temperatures through mechanical decoupling
- Good cleanability thanks to flush-mounted installation
- Robust measuring cell guarantees long-term stability

Show Product

VEGAPOINT 23

Capacitive level sensor as overfill protection

- Compact design facilitates cleaning
- Reliable detection of the medium, independent of buildup
- 360° display of the switching status
