Simple installation

Level measurement in the reservoir tank for hydraulic oil

Hydraulic oil reservoir tank

The hydraulic oil used to transmit power circulates in a closed system. However, it is gradually lost due to lubrication points and leakages in the power equipment. To ensure optimum operation of the power equipment, the level in every hydraulic oil reservoir tank must be monitored for replenishment.

More details

VEGAFLEX 81

Level measurement with guided radar in the hydraulic oil reservoir tank

- · Precise measurement, independent of media properties
- High measurement reliability even with buildup
- Simple setup and commissioning saves time
