

Reliable

Reliable monitoring of river levels

Cost effective Simple installation and signal transmission

User friendly

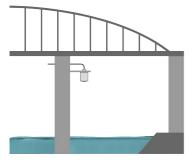

Wireless transmission of measured values

Gauge station

River level measurement

Accurate monitoring of the river level is an important prerequisite to be able to react quickly and correctly in the event of a flood. Data recording and transmission via radio link is the optimal solution for getting level information on rivers in remote areas without power.

More details

VEGAPULS C 23

Radar sensor for gauge measurement

- Maintenance-free operation through non-contact 80 GHz radar technology
- Highly resistant materials ensure a long service life and maintenance-free operation
- Secure wireless operation via Bluetooth with smartphone, tablet or PC

Show Product

Mounting accessories

Mounting bracket with adjustable sensor adaptor

- Adjustable sensor mounting bracket allows easy installation and alignment of sensors
- Weatherproof and robust with 316L stainless steel construction

	(****
Measuring range - Distance 30 m	Materials, wetted parts 316L
Process temperature -40 80 °C	
Process pressure -1 3 bar	
Accuracy ± 2 mm	
Frequency 80 GHz	
Beam angle 4°	_
Materials, wetted parts PVDF	_
Threaded connection G1, 1 NPT, R1	
Protection rating IP66/IP68 (3 bar), Type 6P	
Output 4 20 mA/HART Modbus
