

#### Reliable

Certified materials according to FDA and EC 1935/2004 regulations

#### Cost effective

Continuous filling process thanks to reliable measurement

#### User friendly

Simple installation and setup

## Storage tank for beer bottling

### Level measurement and point level detection in the supply tank of a bottling machine

Beer is continuously delivered into the filler supply tank of the bottling machine. Reliable level measurement is important for an optimal filling process. A point level sensor is used to also prevent dry run.

### VEGAPULS 42

Non-contact level measurement with radar in the filling machine

- Maintenance-free operation thanks to non-contact measuring principle
- Simple automation and integration options thanks to IO-Link
- Compact design allows installation even in very small vessels
