

#### Reliable

Reliable content measurement in the sludge thickening tank

### **Cost effective**

Non-contact measurement ensures maintenance-free operation

### User friendly

Simple installation and setup

More details

Level measurement in a sludge concentration tank

Sludge thickening tank

## **VEGADIS 82**

External measured value display in field housing

Easy-to-read display with plain text and graphics

Before the sludge enters the digestion tower, it is stored in large vessels. During storage, the sludge is

dewatered and thickened sometimes scrapers and agitators are used to accelerate the process.

- Robust housing designed for the harsh conditions in the field

# **VEGAPULS C 21**

Continuous level measurement with radar for contents measurement in the receiving container

- Maintenance-free operation through non-contact 80 GHz radar technology
- Exact measuring results independent of product, process and ambient conditions
- High resistance materials ensure a long service life
- Secure wireless operation via Bluetooth with smartphone, tablet or PC
